# Online Home Learning and Keeping Your Child Safe

**Kelsie Hawes**  
Assistant Headteacher

Online Actions, Real World  
Consequences

# Bullying

- Children are taught about it through the PSHE curriculum
- Anti-bullying awareness events
- Bullying is classed as being: **persistent, painful and powerful.**
- Bullying is dealt with in line with school behavior policy.
- Accidents
- Specific language
- ✗ *“They are bullying me”*
- ✓ *“They pushed me” “They called me stupid”*

What does your child love doing online?  
What services and devices do they use?

**ROBLOX**

**FORTNITE**

Google

 YouTube

**NETFLIX**

The online world can be exciting and inspiring. It has lots of opportunities to offer young people. It is important to manage and minimise the associated risks.

# Games and Apps

Roblox

Twitter/X - 13

# Conduct

Online behaviour & sharing

Children need to be aware of the impact that their online activity can have on both themselves and others, and how other people may perceive them because of what they say and do online.

It's easy to feel anonymous online and it's important that children are aware of who is able to view, and potentially share, the information, photos and videos that they may have posted.

When using the internet, it's important to keep personal information (that could identify who they are) safe and not share it with strangers.

# Content

What children see online

Some online content is not suitable for children and may be hurtful or harmful. This is true for content accessed and viewed via social media, online games, streams and websites.

Live comments and chats alongside other content including videos, streams and games can be hurtful, harmful or unreliable.

It's important for children to consider the reliability of online material and be aware that it might not be true or written with a bias. Photos and videos can also be edited or inaccurate.

# Contact

Online communication

**It is important for children to realise that new friends made online may not be who they say they are and that once a friend is added to an online account, you may be sharing your personal information with them.**

**If you have concerns that your child is, or has been, the subject of inappropriate sexual contact or approach by another person (including, but not limited to, a request to meet up or a request for images/videos), it's vital that you report it to the police via:**

**Child Exploitation and Online Protection Centre ([www.ceop.police.uk](http://www.ceop.police.uk)).**

# Online bullying

Also known as 'cyberbullying' - takes place online or using technology.

Cyberbullying can happen in many different ways including unkind messages or comments, the sharing of embarrassing photos or exclusion from group chats.

Children need to understand that their online actions can be just as hurtful as offline actions and that seeking to deliberately hurt or upset someone is always unacceptable.

90% of children have experiences of witnessed cyberbullying

# Nudes and sexting

Sexting is taking and sharing a nude, partially nude or sexually explicit image or video.

If the person in the image is under-18 then it **breaks the law**. The Protection of Children Act states that it is illegal to create, distribute or possess an indecent image of a child, including images or videos taken by the child themselves (e.g. selfies).

The police take a common sense approach and are not seeking to criminalise young people, but do have a duty of care if asked to investigate.

In the online world, content can get very far, very quickly and young people may lose control of who else sees their image. Knowing an image has been seen by others can be very difficult and traumatic for a young person to experience.

Sexting is a risk even for younger children. A child with access to a device, who can take a photo and send it on, may not understand the possible consequences and just think they're being funny.

# Self-Generated Imagery

Self-generated imagery refers to where a child has been coerced into taking imagery of themselves by another person via a screen (e.g. webcam/camera phone).

**This often happens in the child's home, e.g. bedroom or bathroom.**

- Majority of Child Sexual Abuse Material is self-generated.
- Majority of self-generated imagery is girls.
- 64% contained both genders (e.g. children being coerced to abuse siblings/peers).

**Self-generated imagery featuring 7-10 year olds increased by 65% (104,282 reports) in 2023.**

- 41% of self-generated imagery included a 7-10 year old girl.

## **Self-Generated - 3 to 6 Year olds**

- Overall 2,401 images, 91% of which were girls.
- The majority of images (47%) were taken in the bedroom or bathroom (12%).

# YouTube/Roblox - What are the dangers?

## Explicit content

- Content that is only appropriate for **older age groups**.
- Swearing, inappropriate song lyrics, violence, misogynistic language, racist language and sexualised language and behaviour.
- Suggested videos and auto play
- YouTube shorts algorithms - AI generated content.

## Misinformation

- Home to a lot of fake news or misinformation.
- Children believe content creators.

## User-generated content

- Roblox thrives on the imagination of its players, users build “experiences” within Roblox that contain adult content — including profane language, violence, and sexually explicit imagery.
- Text messaging and voice chat

# YouTube Kids

<https://www.instagram.com/reel/DNEtKe6gQZL/>

The screenshot shows an Instagram reel. The top half of the video features a Cocomelon character (a baby) and a man. The bottom half features a man with glasses speaking. The text on the screen reads: "The daddies on bus go 'I love you!'" and "Cocomelon is wholesome. They have nothing to do with this. I was just training the algorithm on harmless kids content to start."

This kids YouTube algorithm has worse AI videos. #aivideo #aisafety #safety #fyp #cat Yesterday I created a fresh YouTube account then watched an hour of autoplayed Cocomelon videos. I then started scrolling YouTube shorts and was shocked. Today, it continues to devolve, getting worse AI content. It eventually turned around to more regular brain rot and less AI, but the scale of the AI videos is still out of control.

**mclemonyfresh** 6 w  
Just one correction- cocomelon is not "wholesome". They have scientifically engineered their show
